**Date:** Monday, June 15, 2015 12:32:00 PM

---

Hi Ian,

EPA will allow a one month extension for the submission of the 7 Cedars Casino copper corrosion control treatment recommendation. As stated in our January 6, 2015, letter, the corrosion control treatment recommendation can be sent directly to me. I've been asked to mention that if the report is not received by July 31<sup>st</sup>, the 7 Cedars Casino will incur a treatment technique violation, which would require the posting of a public notice that explains the violation.

If you have any questions, please feel free to contact me.

Wendy

**Subject:** Calcium, Conductivity, and alkilinity

Good afternoon Wendy. I just wanted to let you know that I did the second round of testing for the alkalinity, conductivity, and calcium for the 7 cedars casino. I spoke with Twiss and I should have the results of last week's lead and copper testing and this week's test back next week. I've attached the results of the first alkalinity, conductivity, and calcium test I did. I've been asked to pass on along a request for a 30day extension for the submission of our copper control plan. I understand if that's a no. I'm seeking to avoid needing an extension altogether . Thanks again for the help.
